

Applied AI for government, from policy to production.

We help agencies and prime contractors adopt AI safely and put it to work — AI enablement and governance, governed deployment with human review and audit trails, and the workflow and platform modernization around it.

| CORE COMPETENCIES

AI enablement & governance — AI strategy, acceptable-use policy, risk and data boundaries, and workforce upskilling.

Governed AI deployment — human-in-the-loop approval, audit logging, and model-agnostic architecture.

Knowledge assistants (RAG) — cited answers over policy, program, and technical documents.

Workflow modernization — AI-assisted intake, document review, drafting, and routing.

Cloud, data & integration — AWS and FedRAMP-aligned GCP; Salesforce, SAP, and ServiceNow integration.

Program & product leadership — Agile and SAFe delivery, roadmaps, MVP definition, and transition to operations.

CMMC & compliance — AI-assisted CMMC readiness for defense contractors, delivered through A3PO.

Staff augmentation — senior AI, product, and program staff for prime contractor teams.

| PAST PERFORMANCE

Sandia National Laboratories (DOE) — Zero Trust implementation

Project management, subcontractor to Agiletek (Apr–Sep 2024). Coordinated IT delivery — schedule, risk, and stakeholders — to roll out Zero Trust controls in a controlled federal research environment.

NTT / Dimension Data — global eCommerce transformation

Subcontractor to Z&M Group. Embedded delivery leadership across Salesforce, SAP, ServiceNow, and GCP on an \$8B+ program. 90% quote-to-cash cycle time reduction; 10x renewals workflow improvement.

A3PO — AI-assisted CMMC readiness platform

Designed and built with Alpha Team Solutions: AI document and evidence analysis with human expert review, in a secure cloud architecture.

Pengwin — AI proposal generation platform

Developed by Innovution: guided workflows, reusable knowledge, and generative drafting with human review.

| DIFFERENTIATORS

We build, not just advise. Two AI platforms in production, designed and built by our team — A3PO (with Alpha Team Solutions) and Pengwin.

Governance is built in. Every model output traceable to its prompt, its sources, and the person who approved it.

Principal-led. The person who scopes the work leads it. No hand-off to a junior team.

COMPANY DATA

Legal name	Innovution Incorporated
UEI	GSXGEVG8Q837
CAGE	14CC0
Established	2011
Business type	Small business
Primary NAICS	541512 Computer Systems Design
Other NAICS	541511 · 541519 · 541611
PSC	AC33 · DA01 · DA10 · R408 · R425
Payment	ACH / EFT

KEY PERSONNEL

Waqqas Ali

Founder & CEO · Principal

15 years leading enterprise transformation, including product team leadership on NTT's global eCommerce program. Architect of A3PO and Pengwin. AWS Certified.

TEAMING

Available as prime or subcontractor. We bring AI enablement, governed AI, and workflow modernization to prime contractors' teams.
